Suzuki GSX RR 2020 (Tamiya 14139) - clutch
Catalog no.: FSM 4

This kit replaces part D56 from the base kit Tamiya 14139

Cut all parts with sharp cutters like Tamiya 74123. Do not break off parts.

Installation guide

1. Cut off all the supports from the clutch. Cut the supports one by one. When done smooth the bottom of the part.

Supports to remove

2. Cut off all the supports from the clutch basket. Cut them one by one as clutch basket is fragile. If needed smooth the bottom of the part with the file.

Supports to remove

3. Make a dry fit of both parts before painting. Clutch basket should fit in place smoothly and stay there without any glue. If needed sand down gently one of the parts (inner part of the basket or clutch discs). If clutch basket is loose with the clutch use Micro Krista Clear glue or similar to fix it in place after painting.

Installation procedure
